

The AI Tech Company | Self-Machine-Learning Platform™

Our HR Solutions

1

Company Hire Prediction (CHP)

Predict which company, in your defined market, will hire or lay off people, ranked from the most to the least relevant.

2

Company Position Prediction (CPP)

Predict which position in your market will be the hottest in the near future.

3

Company-Candidate Matching (CCM)

Upload your CVs on the Self-Machine-Learning Platform™ to match them with future positions or hiring companies allowing you to beat the market.

Our unique Self-ML Platform™ automates many of the complicated and time-consuming tasks. It's faster, cheaper, more flexible, and more accurate than building traditional machine learning models. It is offered as a PaaS, ready-to-use and personalized to suit your needs.

Benefits

Match based on transferrable skills & cultural fit

Generate hot leads

Automate your research processes

Save data cost

Connect deeply with candidates

Our mission is to make AI and machine learning more accessible and easier to use for every organization to help you disrupt your Business and enable sustainable change.
